Comments:

What to expect at your first appointment:

Once you schedule your initial appointment, we will forward a questionnaire for you to complete and mail back to us. Dr. Eng will review these forms prior to your scheduled appointment, so he can better understand your case and is able to structure his examination. Your first appointment is approximately 1.5 hours, during which a comprehensive examination and necessary x-rays will be performed.

The fee for the initial evaluation is your responsibility, and is due on the day of the examination. Your examination and the recommended treatment may qualify for dental reimbursement. We do accept Visa & MasterCard and personal checks.
